

EXTRACORPOREAL SHOCK WAVE THERAPY (ESWT) SWISS DOLORCLAST® METHOD →

- > Delivers high-energy shock waves to the tissue via the skin.
- > Activates your body's self-healing processes where pain occurs.
- > Increases metabolic activity through improved blood circulation and the formation of new blood vessels.
- > Nurtures and accelerates the healing process through cell regeneration.

CHRONIC PAIN →

- > Each day, chronic pain drains those people who suffer from it; it saps their joy of life and affects the quality of life. A painful heel, for example, makes every step more challenging than it should be.
- > Chronic pain often limits the regular practice of sports such as jogging, walking, golf. Tennis elbow, for example, may cause you to give up your favorite game.
- > Chronic pain also affects performance on the job. Acute shoulder pain, for example, drains your physical and mental capacity with the slightest arm movement.

→ SIMPLE TREATMENT

YOUR DOCTOR LOCATES THE PAIN THROUGH PALPATION OR ULTRASOUND.
NO SURGERY, NO ASSOCIATED RISKS.
NO STRONG MEDICATION - NO BROTHERSOME SIDE EFFECTS.
UNCOMPLICATED OUTPATIENT PROCEDURE - FAST, GENTLE AND EFFECTIVE
